CONTENTS

No. 1, February 1994

PAGE

Wolfgang Wieser. Cost of growth in cells and organisms: general rules and comparative aspects 1

Tony D. Williams. Intraspecific variation in egg size and egg composition in birds: effects on offspring fitness 35

John A. Raven, Andrew M. Johnston, Richard Parsons & Janet Kübler. The influence of natural and experimental high O_2 concentrations on O_2-evolving phototrophs 61

H. J. Peat & A. H. Fitter. Comparative analyses of ecological characteristics of British angiosperms 95

No. 2, May 1994

Kurt R. H. Repke & Rudolf Schön. Synthesis of a self-contained concept of the molecular mechanism of energy interconversion by H^+-transporting ATP synthase 119

Jon Lovett Doust, Monica Schmidt & Lesley Lovett Doust. Biological assessment of aquatic pollution: a review, with emphasis on plants as biomonitors 147

Jens Krause. Differential fitness returns in relation to spatial position in groups 187

C. M. Heyes. Social learning in animals: categories and mechanisms . . 207

Keiji Shikama & Ariki Matsuoka. *Aplysia* myoglobin with unusual properties: another prototype in myoglobin and haemoglobin biochemistry . . 233

No. 3, August 1994

P. R. Bell. Introduction to special issue 'The regulation of alternation of generation in flowering plants'. 259

Alan R. Hemsley. The origin of the land plant sporophyte: an interpolational scenario 263

David M. John. Alternation of generations in algae: its complexity, maintenance and evolution 275

PAUL KENRICK. Alternation of generations in land plants: new phylogenetic and palaeobotanical evidence 293
E. SHEFFIELD. Alternation of generations in ferns: mechanisms and significance 331
RICHARD M. BATEMAN & WILLIAMS A. DIMICHELE. Heterospory: the most iterative key innovation in the evolutionary history of the plant kingdom 345
H. G. DICKINSON. The regulation of alternation of generation in flower plants 419

NO. 4, NOVEMBER 1994

A. W. F. EDWARDS. The fundamental theorem of natural selection . . . 443
PETER W. BARLOW. Rhythm, periodicity and polarity as bases for morphogenesis in plants 475
RICHARD M. BATEMAN. Evolutionary-developmental change in the growth architecture of fossil rhizomorphic lycopsids: scenarios constructed on cladistic foundations 527
MOSHE WOLF & YEHUDAH L. WERNER. The striped colour pattern and striped/non-striped polymorphism in snakes (Reptilia: Ophidia) 599

INDEX OF AUTHORS

BARLOW, P. W. Rhythm, periodicity and polarity as bases for morphogenesis in plants 475
BATEMAN, R. Evolutionary-developmental change in the growth architecture of fossil rhizomorphic lycopsids: scenarios constructed in cladistic foundations 527
BATEMAN, R. M. & DIMICHELE, W. A. Heterospory: the most iterative key innovation in the evolutionary history of the plant kingdom . . . 345
BELL, P. R. Introduction to special issue 'The regulation of alternation of generation in flowering plants'. 259
DICKINSON, H. G. The regulation of alternation of generation in flowering plants 419
EDWARDS, A. W. F. The fundamental theorem of natural selection . . . 443
HEMSLEY, A. R. The origin of the land plant sporophyte: an interpolational scenario 263
HEYES, C. M. Social learning in animals: categories and mechanisms . . 207
JOHN, D. M. Alternation of generations in algae: its complexity, maintenance and evolution 275
KENRICK, P. Alternation of generations in land plants: new phylogenetic and palaeobotanical evidence 293
